Grassy Area adjacent to Pilot's Lounge
- **Whiteman Display Day**
Every 2nd Sunday
10:00 AM – 2:00 PM

2015 Airport Commission Meetings

September 30, 2015 7:00 pm	KWJF
October 28, 2015 10:00 am	KWHP
November 25, 2015 10:00 am	KEMT
December 2015 No Meeting	

From the Manager..

Andrew Marino, Airport Manager
amarino@americanairports.net

Whiteman Airport Open House. Our annual Airport Open House will take place on Saturday, September 26, from 10 a.m. until 2 p.m. and will be held on the ramp next to the Administration Office. Those that would like to participate by exhibiting their aircraft or hosting a booth for an aviation club or organization should contact my office at (818) 896-5271 to make arrangements. For those that have come out in past years, we hope to see you again this year and for those that have not attended before, we encourage you to come out, say "hi" and meet with fellow pilots and members off our surrounding community!

Hangar Inspection Schedule.

Our 2015 annual hangar inspections are currently underway here at Whiteman. The emphasis of these inspections is both safety and lease compliance. If you are unable to be at the hangar briefly on the date and time listed below please contact the Airport Administration Office at (818) 896-5271 so that we may arrange another

more convenient appointment time for the inspection. The inspection will only take a few minutes and will focus on fire hazards or hazardous materials in the hangar, making sure there is a working fire extinguisher in the hangar, checking to see if the aircraft in the hangar matches the aircraft on record and any signs of unauthorized commercial operations.

Each hangar row is listed below with a date. We will be stationed at these hangar rows on that date from 8 a.m. until 5 p.m. and you may show up anytime during these hours for the inspection.

B, C, D Rows: Wednesday, October 7th
E, F, G, H, J Rows: Thursday, October 8th
BB, CC, DD, U & T Rows: Friday, October 9th

Hangar tenants located in third party hangars have either already been inspected or may be contacted shortly by their landlords with the dates and times of their respective inspection.

I greatly appreciate your help in completing this process quickly and efficiently. I know it is often an inconvenience and I appreciate your efforts in helping us complete this mandated process. As mentioned earlier, if the date and time listed above does not work for you please contact me and we can arrange for a more convenient time. Thank you in advance for all your cooperation!

Need Hangar Repairs? If you are having difficulty with your hangar please do not hesitate to call the office at (818) 896-5271 so that we may diagnose the problem and make the appropriate fixes.

FAA Monthly Seminars. There is an FAA Safety meeting every month. For meeting information, please see the website at <http://faasafety.gov>. It is held in the Civil Air Patrol trailer.

Aviation Quote of the Month

I have often said that the lure of flying is the lure of beauty. That the reasons flyers fly, whether they know it or not, is the aesthetic appeal of flying.

— Amelia Earhart.

Oct. 1 end date for 'Flight Watch' frequency 122.0

August 18, 2015 By Dan Namowitz | www.aopa.org

AOPA is reminding members that the FAA will discontinue the universal Flight Watch frequency 122.0 MHz for in-flight weather services on Oct. 1. Weather services provided under the Flight Watch program En route Flight Advisory Service (EFAS) will continue to be provided via charted frequencies pilots use to obtain weather information, open and close flight plans, and for updates on notams and temporary flight restrictions (TFRs). Pilots also may continue to use the universal frequency 122.2 MHz, the FAA said. The FAA also will end the little-used Remote Airport Advisory Service in the continental United States on Oct. 1.

The changes come as pilots transition "from traditional Flight Service assistance to more automated and web-based tools to obtain services. Through the use of updated technology Flight Service is taking the opportunity to eliminate redundancies and underutilized services," the FAA informed pilots in a message on its website.

Providing the weather services on local flight service frequencies will resolve issues of bleed-over and frequency congestion that have occurred on 122.0 MHz. Another advantage of the change will be the availability of the services on Flight Service frequencies monitored 24 hours a day, seven days a week, as opposed to the limited monitoring of 122.0 MHz, said Rune Duke, AOPA director of government affairs for airspace and air traffic.

AOPA has worked with the FAA to make pilots aware that the frequency 122.0 MHz will be decommissioned, and is working to assure pilots that the in-flight weather services will continue to be provided on other frequencies.

After Oct. 1, the FAA will continue to monitor 122.0 MHz for several months to assist pilots in locating a local frequency, the agency said.

The Remote Airport Advisory Service to be ended affects 19 airports, and is provided remotely by Flight Service personnel. The FAA has cited a substantial decrease in demand for the service now that many of the airports have been equipped with automated weather and air traffic control.

The FAA will issue notams for each airport at which the service will be discontinued, and will update flight information publications during regular publication cycles.

The Airport Advisory Service in Alaska will continue to be provided, the FAA said.
